

D2 - Parenting Parents: Supporting Pregnant & Parenting Teens

Raising a teen has its challenges, raising a pregnant or parenting teen has its own set of unique challenges. Providing support and education to pregnant and parenting men and women while maintaining boundaries is important. This training will cover many different areas including tools to support teen parents, how to parent a teen while helping them be a successful parent, and supporting the relationships between teen parents (mom and dad). By providing support we are able to provide both teen mothers and fathers with valuable tools to empower them to make healthy choices for themselves and their child. *Trainer: Bobbie Jo Sheridan (Approved for CEUs)*
